PROFESSIONAL SUMMARY

Senior Software Engineer with 10 years of experience building scalable and cloud-native backend systems. Expert in Python, event-driven architectures, and serverless applications. Proven track record delivering high-impact solutions: **reducing cloud costs by 90%**, **improving system reliability by 40%**, and **accelerating deployment cycles by 70%**.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, Go, SQL

Backend & Frameworks: FastAPI, Django/DRF, Spring Boot, Node.js, GraphQL, Microservices

AI/ML: Azure AI Foundry, Azure OpenAI, Semantic Kernel, SageMaker, LangChain, LangGraph, RAG, PyTorch, scikit-learn, Pandas, OpenCV

Cloud & DevOps: Azure, AWS, Docker, AWS CDK, Jenkins, Ansible, Serverless Frameworks, RabbitMQ, NATS, Redis

Frontend & Mobile: Next.js, React, Flutter

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Elasticsearch

Monitoring: New Relic, Sentry, Grafana, Datadog

PROFESSIONAL EXPERIENCE

Python Full Stack Engineer

Wynn Resorts

Dubai, UAE

Jan 2025 – Present

- Collaborating with the data team to design and develop scalable system integrations across enterprise platforms using Python and agentic AI workflows on the Azure AI stack.
- Building intelligent automation pipelines on Azure AI Foundry, leveraging Azure OpenAI and Semantic Kernel to streamline data ingestion, transformation, and cross-system orchestration.
- Developing Python services and APIs to bridge multiple data sources, improving operational efficiency and decision-making.
- **Tech Stack:** Python, Azure AI Foundry, Azure OpenAI, Azure AI Search, Semantic Kernel, FastAPI, Azure Functions, SQL.

Senior Software Engineer

Connect Resources

Dubai, UAE

Jan 2024 – Nov 2025

- Architected an ML-driven rebill optimization engine using SageMaker, increasing successful recurring transactions by **15%** via intelligent retry timings.
- Engineered an LLM-powered internal chatbot with RAG capabilities, reducing manual data lookup time by **80%** and supporting over 100 internal users with real-time business insights.
- Designed and developed microservices for e-commerce, memberships, and chat systems, ensuring high availability and fault tolerance.
- Implemented a high-performance NATS messaging architecture (clustered), reducing system latency by **50%** and improving reliability by **40%**.
- Automated provisioning and deployments using Ansible, Docker, and Jenkins, cutting setup time by **70%**.
- **Tech Stack:** Python, FastAPI, Java, Spring Boot, Node.js, AWS (Lambda, Glue, SageMaker, ECS), MongoDB, NATS, Go.

Full Stack Software Engineer

OJ Lifestyle

Dubai, UAE

May 2022 – Dec 2023

- Led the full agile development lifecycle, boosting team delivery velocity by **30%** through improved sprint planning and automation.
- Designed a scalable, highly available loyalty platform supporting **5,000+** active user subscriptions.
- Launched a vendor management portal used by **50+ partners**, increasing vendor engagement by **40%**.
- Built a fault-tolerant Stripe subscription billing solution, achieving **99.99% success rate** and reducing involuntary churn by **25%**.

- Streamlined CI/CD using GitHub Actions, reducing deployment time by **60%**.
- **Tech Stack:** Python, Django, DRF, PostgreSQL, MongoDB, Stripe, Next.js, Flutter, AWS (Lambda, ECS, EC2, ALB, RDS, S3, Step Functions).

Full Stack Software Engineer

Dubai, UAE

Berkeley Assets

Mar 2021 – Apr 2022

- Developed a serverless backend using AWS Lambda and Django, reducing infrastructure costs by **40%**.
- Created internal CRMs, increasing team operational efficiency by **25%** through workflow automation.
- Implemented a custom Django Admin back office with DRF APIs and payment integrations (Stripe, Telr), achieving **99.9% transaction reliability**.
- Delivered cross-platform mobile apps (Novus Assets Portfolio), increasing mobile feature delivery speed by **50%**.
- **Tech Stack:** Python, Django/DRF, React Native, AWS, Jenkins, Bitbucket Pipelines.

Software Engineer

Dubai, UAE

sellanycar.com

Jan 2020 – Mar 2021

- Created a highly efficient serverless image processing pipeline using OpenCV, AWS Lambda, and Step Functions, handling millions of uploads and reducing processing time by **40%**.
- Optimized workflow with AWS Step Functions, cutting system execution time by **80%**.
- Integrated microservices through GraphQL and RabbitMQ for asynchronous communication, improving performance by **30%**.
- Established CI/CD using Jenkins, eliminating **90%** of manual deployment errors.
- **Tech Stack:** Python, AWS (Lambda, Step Functions, CloudFormation), Node.js, GraphQL, RabbitMQ, OpenCV, PostgreSQL.

Software Engineer I/II

Karachi, Pakistan

VentureDive

Feb 2016 – Dec 2019

- Developed microservices powering **VistaJet's** global charter platform and collaborated with distributed teams in Brazil and Ukraine.
- Led full-stack development for **ServiceMarket**, optimizing CI/CD and feature rollout speed.
- Migrated **beatthemarket.com** infrastructure from Linode to AWS EC2, reducing server costs by **90%** and improving reliability by **80%**.
- Architected the **zGlue ChipBuilder** CAD platform, enabling engineers to visualize and assemble IoT circuits via modular microservices.
- **Tech Stack:** Python, Django/DRF, Node.js, CakePHP, React, Microservices, Jenkins, AWS, Tableau.

EDUCATION

- Bachelor of Computer Science

2012 – 2015

University of Karachi

CERTIFICATIONS AND AWARDS

- AWS Certified Solutions Architect - Associate
- Winner - VentureDive's Hackathon

2016

2018
