

Application for General Practitioner Position

Dear Hiring Manager,

I am writing to express my interest in the General Practitioner position at your organisation. I am a DHA-licensed and GMC-registered physician with MRCP Part 1 and Part 2, currently practising in Dubai and holding a UAE Golden Visa. With several years of experience in primary care, chronic disease management, acute care, and home healthcare, I bring a patient-centred, evidence-based approach to clinical practice. I am immediately available to join and would welcome the opportunity to contribute to your clinical team.

I currently practise as a General Practitioner at Platinum Healthcare in Al Qusais, Dubai, providing comprehensive consultations and follow-up care for patients across all age groups. My clinical responsibilities include managing acute presentations and chronic conditions such as diabetes, hypertension, and asthma, interpreting diagnostic investigations, providing preventive care and vaccinations, coordinating specialist referrals, and maintaining accurate EMR documentation. I also work closely with medical insurance providers on authorisations, billing, and claims. Through proactive patient communication and structured care planning, I have contributed to a 90% improvement in patient satisfaction and follow-up adherence, while managing approximately 10–12 consultations per day.

Alongside this role, I serve as Medical Director at Chris One Point Homecare, where I oversee clinical operations, supervise and mentor a multidisciplinary team, develop evidence-based clinical protocols, review complex cases, and lead quality and compliance initiatives. This role has strengthened my ability to combine clinical decision-making with effective team leadership, clinical governance, and a strong focus on patient safety and quality of care.

Previously, I worked for three years as a General Practitioner at Noor Medical Centre, where I managed a broad range of acute and chronic presentations, performed comprehensive clinical assessments, formulated evidence-based treatment plans, and provided counselling on prevention, lifestyle modification, and medication adherence. My early clinical training was completed at Jinnah Postgraduate Medical Centre, Karachi, where I rotated through Accident & Emergency, General Medicine, General Surgery, and Anaesthesia/ICU, developing a strong foundation in acute assessment, patient management, escalation, and multidisciplinary care.

Academically, I hold an MBBS from Jinnah Sindh Medical University and have completed PLAB, MRCP Part 1 and MRCP Part 2, alongside certifications and professional training in Advanced Cardiac Life Support (ACLS), Infection Prevention and Control, Cardiology in Primary Care, and Diabetes. I have also contributed to research and publications in areas including type 2 diabetes, sleep quality in patients with diabetes, and voluntary blood donation.

I believe my combination of clinical experience in the UAE, postgraduate medical qualifications, leadership experience, and commitment to evidence-based patient care would allow me to make a meaningful contribution to your organisation. I am particularly committed to delivering safe, compassionate, and efficient care while maintaining high standards of clinical governance, documentation, and professional practice.

I would appreciate the opportunity to discuss how my experience and qualifications align with your organisation's requirements. Thank you for considering my application, and I look forward to hearing from you.

Sincerely,

Dr. Ramsha Batool

General Practitioner | DHA Licensed | GMC (UK) Registered | MRCP Part 1 & Part 2
